CV-49 D1 Fee Determination

From the most recent 10/790,316 Office Action, there is a total of 42 claims pending, including 1 independent claim and a multiple dependent claim.

Per the attached Patent Application Fee Determination Record, there has been paid \$1966 to the account including 170 total claims, 4 independent claims and a multiple dependent claim fee. Taking away filing fees and claims in use under 10/790,316, there is available on the 10/790,316 account \$1,281, which includes 128 total claims and 3 independent claims.

This application, (CV-49 D1) comprises a total of 58 claims, including 1 independent claim and a required multiple dependent claim fee. Therefore this application comprises 38 extra claims, filing fees and a multiple dependent claim fee.

From the previous paid and available 128 claims, Applicant wishes to apply 38 claims to this application (CV-49 D1). This leaves 90 total claims and 3 independent claims within \$939 still available on account (10/790,316), e.g. $\$1,281 - (38 \times \$9)$.

Applicant wishes to apply \$515 and \$185 of the remaining \$939 to the remaining required Fees due on this application (CV-49 D1, \$700), therein leaving a total of \$239 left on account (10/790,316).

As there is no form available at the US PTO for this calculation, Applicant trusts that this communication will suffice an explanation to the LIE.
